

Welcome to the School of Practical Mysticism!

Ever feel overwhelmed with life? That things are just moving 'too fast'? So many ideas, expectations, responsibilities, fears... You've heard that Meditation promises to 'fix' all that... but who has the time?

So maybe you go to a psychic. And they'll give you a different perspective, tell you what energy is in your space, give you a next-step on working on your creations. And that's fantastic-- "Wow, maybe I can get out from under all this drama in my life!"

But maybe that's not enough. Maybe you're not satisfied with someone 'telling' you an answer, or 'fixing' the energy in your space.

What if you could learn to do this yourself...?

...What if all those 'exalted states' described in mystical tracts were actually achievable?

What if there were clear, simple, straightforward techniques to:

- quiet the [noise] in your head
- find your space
- heal your body
- activate your Creativity
- find your Own Truth

Join us as we explore the limits of your Spirit, using the techniques of psychic energy meditation. Welcome! <>
